SOFTWARE TECHNOLOGY, INC.

CAPABILITY STATEMENT

CLEARED SMALL BUSINESS · U.S. NAVY PROGRAM SUPPORT

On-site support to the **U.S. Navy since 2004**: classified information control, fleet training systems and test-site logistics for NAVSEA and Team Submarine, with recent cybersecurity T&E and shipbuilding oversight. **SeaPort-NxG prime. Secret facility clearance.**

UEI LWSGH1XNC5N1 **CAGE** 1UVD1 **NAICS** 541330 (primary), 541990, 541512, 541690 **PSC** R408, R699 **Size** Small Business

COMPANY OVERVIEW

Cosmic Software Technology, Inc. is a cleared small business that places experienced, Secret-cleared professionals inside Navy program offices, training centers and test sites. Since 2013 we have supported NAVSEA PMS 397 (COLUMBIA), including joint PMS 397/450 work, and since 2010 we have provided continuous on-site support at NSWC Carderock's Acoustic Research Detachment.

CORE COMPETENCIES

- **Classified Information & Records Management.** Designated PMS 397 SIPRNET CNSI control point for classified correspondence with Electric Boat and SUPSHIP Groton; processes up to 450 classified and controlled documents a month; SIPRNET, CUI and CDMS repository management.
- **Fleet Training Systems.** COLUMBIA trainer and training-device development, factory training, curriculum revision and technical manual reviews at the Submarine Learning Center, New London.
- **Test-Site Logistics & Facility Support.** Warehouse, hazmat and DLA disposal, parts acquisition, rigging, and on-lake range-safety boat operations at NSWCCD ARD, Bayview, ID.

RECENT PAST PERFORMANCE (2022 – 2026)

- **Cybersecurity Test & Evaluation.** Served as PMS 397 cyber T&E lead and COLUMBIA co-chair of the Submarine Cybersecurity Integrated Test Team (SCITT) with PMS 450 and NUWC Newport; cyber test planning, CVI test readiness reviews, TEMP and LFT&E support.
- **Shipbuilding Oversight & Quality Surveillance.** Provided on-site construction surveillance support at Newport News Shipbuilding for the joint PMS 397/450 groups and SUPSHIP Newport News: surveillance instructions, audits and AI-assisted trend analysis.
